The EuroBiotech Journal is official scientific publication of the European Biotechnology Thematic Network Association (EBTNA).

Aim and Scope

The EuroBiotech Journal is a peer-reviewed open-access international journal that publishes original articles, reviews and case reports in all fields of biotechnology and the life sciences including: Animal Biotechnology, Medical Genetics, Biocatalysis/Biotransformation, Medicine and Biotechnology, Bioinformatics/System Biology, Metabolic Engineering, Bioprocess Engineering, Nanotechnology, Biosensors, Omics Sciences, Biotechnology and Ethics, Pharmaceutical Biotechnology, Biomedical Sciences, Education and Biotechnology, Plant Biotechnology, Environmental Biotechnology, Renewables, Biorefinery, Bioenergy, Biofuels, Bioproducts Enzyme and Protein Engineering Stem Cells, Biomaterials, Tissue Engineering Food and Feed Biotechnology.

Mission

The EuroBiotech Journal's mission is to give scientists a chance to disseminate their findings in Europe and globally and make available scientific data free of charge for researchers. The EuroBiotech Journal also seeks to make accessible selected valuable studies which were presented in annually held European Biotechnology Congresses in the different countries of Europe by EBTNA for the benefit of scientists who could not attend these congresses in person.

The EuroBiotech Journal publishes only online and all articles are available on our website free of charge. Each work will receive a unique DOI (Digital Object Identifier) number.

The EuroBiotech Journal is committed to publishing works in the field of biotechnology by researchers from all over the World which are innovative and contribute to scientific knowledge.

CONTENTS

REVIEW

Medicine and Biotechnology

- 259 **The music in the brain hemispheres**
Giulia Gizzi and Elisabetta Albi

RESEARCH ARTICLES

Bioinformatics / System Biology

- 264 **Genome-wide BigData analytics: Case of yeast stress signature detection**
Zelimir Kurtanjek

- 271 **Classification of coronary artery disease data sets by using a deep neural network**
Abdullah Caliskan and Mehmet Emin Yuksel

Education and Biotechnology

- 278 **Lower limb phantom design and production for blood flow and pressure tests**
Erdem Budak, Faruk Beytar, Mertcan Özdemir, Beyza Nur Susam, Meriç Göker, Aytekin Ünlü and Osman Eroğul

Environmental Biotechnology

- 285 ***Moringa oleifera* (drumstick tree) seed coagulant protein (MoCP) binds cadmium - preparation and characterization of nanoparticles**
Konada R. S. Reddy, Vinay Kumar, Majeti N. V. Prasad and Nadimpalli S. Kumar
- 293 **Health risks of leafy vegetable *Alternanthera philoxeroides* (Alligator weed) rich in phytochemicals and minerals**
Sateesh Suthari, Boda Ravi Kiran and Majeti N. V. Prasad

Food & Feed Biotechnology

- 303 **Extraction, purification and characterization of water soluble galactomannans from *Mimosa pudica* seeds**
Harikrishna Naik Lavudi, Seshagirirao Kottapalli and Francisco M. Goycoolea

- 310 **Utilization of animal fat waste as carbon source by carotenogenic yeasts – a screening study**
Ivana Marova, Martin Szotkowski, Martin Vanek, Marek Rapta, Dana Byrrtusova, Nadzeya Mikheichyk, Andrea Haronikova, Milan Certik and Volha Shapaval

Medical Genetics

- 319 ***cis*- and *trans*- regulation controls of human meiotic recombination at a hotspot**
Mahmut C. Ergören, Rita Neumann, Ingrid Berg and Alec J. Jeffreys

Medicine and Biotechnology

- 332 **Organic selenium effect on body temperature and body weight in broilers**
Adrian Răduță and Dumitru Curcă

Pharmaceutical Biotechnology

- 337 **Phytochemical and antimicrobial evaluation of methanolic extracts of selected Zingiberaceae taxa from Peren district, Nagaland, Northeast India**
Kizukala Jamir and Seshagirirao Kottapalli
